

## **Job Role Document | The Invisible Paintbrush**

### Social Media Internship

Hi there, and welcome to [The Invisible Paintbrush](#) – we're a small agency for small businesses, but with big dreams!

We vehemently believe that small businesses deserve an equal chance in the digital playing field, and we think of ourselves as equalisers. This is why we consciously choose to work almost exclusively with start-ups, family businesses, solopreneurs, and such, and not with big, established, legacy brands.

Our work usually cuts across the entire marketing journey, and we try and offer 'end-to-end' services, but we're best at strategy, design, and creative. Although, in most cases, what we really offer is complete brand ownership, that not only drives the marketing but also the business strategy.

But it's not the outside that we're proud of most – it's the inside. Our culture and our values make us who we are. At Invisible, clients do not come before team members, profits do not come before purpose, and words do not come before actions. We understand that we are in the business of talent, and so we do everything we can to make our teams happier – even if it increases our costs.

We don't work on weekends, holidays, or after-hours. We do not treat clients like gods, and we take mental wellbeing seriously. We also have free Netflix.

Having set up our operations only about a year ago, we're a young agency, and still a small team of just 18 people. But, we're growing fast! And so, we're now looking to build a team of wonderful designers, awesome marketers, and sick strategists, who share our passion for small business, and our distaste for the 'agency life'.

If that sounds like you, we'd love to chat!
